## 9.0 QUALITY ASSURANCE SURVEILLANCE PLAN

The contractor’s performance will be assessed on a continuing basis by application of the contractor-provided performance metrics to evaluate work on task objectives, review of deliverables, technical meetings and general contacts with the contractor. Informal contract management performance reviews will be conducted quarterly and a formal Quality Performance Review (QPR) will be conducted at the conclusion of each Task Order.

The Government technical monitor/contracting officer representative (COR) will utilize the contractor-provided performance evaluation metrics and other inputs mentioned above in conjunction with the QASP Grading Sheet to determine Contractor overall performance in five (5) general areas: 1) Schedule Performance, 2) Management Performance, 3) Technical Performance, 4) Work Product Quality/Accuracy, and 5) Cost Control. Each performance assessment will contain the following three elements: Performance Objective(s), Performance Measurement Factors, and Performance Rating Definitions. When taken in the aggregate, these elements constitute the performance evaluation under the QASP of the individual Task Orders issued under the related contract. A brief description of each of the three (3) elements is as follows:

**Performance Objective** – The contract or Task Order delineation of Deliverables and/or overall objective(s) as described under the Scope.

**Performance Measurement Factor (PMF)** – The critical key characteristics or aspects of achieving the objective(s) that will be monitored by the Government (IHDIV/NSWC, SPT), those matters about which the Government will be gathering data. Each objective will likely have one or more performance measurement factors (PMF).

**Performance Rating and Definitions** – An adjectival and/or numerical objective *rating* with definition of the meaning of each Rating level when applied to each performance measurement factor. The technical monitor/COR has the responsibility for identification of the applicable PMFs and their relevant incorporation into the specific tasking of a contract. Individual Task Orders may specify a minimum acceptable rating, *target* rating, or range of performance ratings on subtasks for certain PMFs.

When numerical ratings are employed for PMFs, or sub factors within a PMF, the rating numbers will be summed together and averaged to arrive at a single numerical value for each PMF and overall value of all relevant PMFs averaged. Failure of the Contractor to meet the required performance measure specified for an individual Task Order will result at a minimum in the Contractor correcting any deficiencies at no additional cost to the Government.

A Contractor Performance Assessment Reporting System (CPARS) type evaluation of all Task Orders performed (in whole or in part) under a given contract will be conducted on an annual basis after contract award. The CPARS evaluation will be based on the contractor’s performance during the previous 12 months. The primary Government official responsible for the CPARS evaluation is the Contracting Officer’s Representative (COR) for the contract. The COR may be assisted, as necessary, by other Government individuals having information relevant to the quality of contractor performance.
